

## Labour Market: Worker Exploitation Economic Development, Transport and Climate Emergency Scrutiny Commission

### Stakeholder questionnaire

The City Mayor's Strategic Plan commits to tackle non-compliance across all sectors that may be blighted by low pay and poor conditions. This questionnaire is part of a collaboration by the Scrutiny Commission with the University of Leicester aiming to gather information on the monitoring, incidence, and practices of worker exploitation across different sectors in Leicester. For these purposes, worker exploitation is seen as a continuum stretching from low pay to poor conditions or Modern Slavery.

Given your expertise worker/community engagement and in combatting specific aspects of worker exploitation, Leicester City Council (Economic Development, Transport and Climate Emergency Scrutiny Commission) would like to invite you to complete this questionnaire prior to the evidence session on worker exploitation. The Commission considers matters which include regeneration, public transport and cycle and car provision, tourism, adult learning and job provision.

We understand that some information might be regarded as sensitive and, in this instance, would encourage you to submit this to either the secretary of the Scrutiny Commission, Dr Ed Brown ([edmund.brown@leicester.gov.uk](mailto:edmund.brown@leicester.gov.uk)) or the University of Leicester research lead, Prof Nik Hammer ([nh80@le.ac.uk](mailto:nh80@le.ac.uk)). Any information received in this regard will be treated confidentially. Equally, you can submit your views to [edmund.brown@leicester.gov.uk](mailto:edmund.brown@leicester.gov.uk) should you be unable to attend.

The information gathered will form part of a report that will be published by the Scrutiny Commission at a future date in 2025. The report will not name any individuals but may, in some instances refer to organisations. Please note, however, that anything highlighted to us as confidential in the process will be treated as such by the Commission and the research team and be appropriately protected in the report.
