**Subject:** Re: Objection of premise license

Good afternoon,

I did not send this email and I am not aware of this email. My friend [REDACTED] has my email address and password and also my house door number is incorrect. I am letting you know that I have not signed any objection petition or any letter to object to this shop opening to apply for a license. I am happy with any business that wants to open that will benefit the local community with choice and flexible opening hours.

Please can you investigate.

Thank you  
[REDACTED]

Dear sir/madam

Premises Licence Application – 2C Uppingham Road Leicester LE5 0QD

I am writing to register my objection to the application for a premises licence by Ajay Valgi for the above address.

The grounds for my objection are:

- the prevention of crime, disorder and antisocial behaviour;
- The protection of public safety;
- The prevention of public nuisance;
- The protection of children from harm.

The application proposes that alcohol will be sold for consumption off the premises between 6:00am and 12.00am, seven days a week. Granting a licence would provide a further source of alcohol within an area already so heavily populated with licensed premises that crime, disorder and public nuisance are higher than the national average.

Residents in this area already suffering from noise nuisance and antisocial behaviour at all hours of the day and night. Residents are scared to go out in the evenings due to the rising levels of anti-social behaviour, loitering and sexual violence crimes. The children's park is constantly full of drunk people and is littered with broken glass and other dangerous paraphernalia.

Kind regards
