**130. DECLARATIONS OF INTEREST**

None.

**131. MINUTES OF PREVIOUS MEETING**

The Panel agreed the notes.

**132. CURRENT DEVELOPMENT PROPOSALS**

**A) 14 Southernhay Road  
Planning Application [20200652](#)**

The Panel commented on the lack of contextual drawings and visuals, which they considered would be beneficial for understanding the relationship of the proposed new dwelling to its streetscene. Some members questioned the lack of a more contemporary design style and the excessive footprint of the rear extension, as well as the loss of garden space. The odd geometry and massing of the new dwellinghouse were also commented on, as was its 'pastiche' design, but the loss of the existing close boarded fence was considered a potential positive. The general form and use, such as building height, was broadly supported.

Members unanimously criticised the impact and extent of hard landscaping to the front, with particular regard to the lack of front boundary treatment and planting to this part of the curtilage, considered of high potential do adversely affect the character and townscape of the Conservation Area. They requested that this is amended, with a brick (dwarf) boundary wall and soft landscaping introduced to the front of the property.

## **SEEK AMENDMENTS**

---

### **B) 64-66 London Road & 17 Glebe Street Planning Application [20200663](#)**

The Panel agreed that the top-storey extension to the modern (rear) portion of the building will not have a notable impact on the character and significance of the South Highfields Conservation Area.

Whilst some members commented on the integrity of the 1920s block to London Road, with special regard to its roofscape, most concluded that the addition of dormers would be welcomed, as adding visual and architectural interest to the building. Amendments to their design, to better match the design and proportions of the existing glazing to frontage, were recommended. More information regarding materiality and finish of glazing and dormers was requested.

## **SEEK AMENDEMENTS**

---

### **C) 2 St James Road, 200 London Road Planning Application [20200429](#)**

Members first discussed the principle of the development. The erection of a two-storey dwelling on site was criticised, considered to have a negative impact on the character of the Conservation Area, leading to a cramped appearance in the streetscene and detracting from the prominent dwellings adjacent to the plot.

The pastiche design and materials (uPVC windows and doors) were also criticised, considered inadequate in its context.

## **OBJECTIONS**

---

### **D) 101-107 RATCLIFFE ROAD, MARY GEE HOUSES HALLS OF RESIDENCE Planning Application [20190433](#)**

In reference to previous comments on the scheme, the Panel concluded that the conservation concerns regarding the excessive mass and 'institutionalised' architectural definition of the development were not addressed by the

amendments. The materiality and finish were criticised, especially in regard to concrete tiles and uPVC windows. Although some amendments were welcomed, including the recessed balconies, these were considered insufficient to render the scheme acceptable from conservation perspective and address the aforementioned concerns.

The Panel retained broader concerns on the basis of the development being contextually inappropriate, with dominant massing and excessive visual impact on the Conservation Area.

## **OBJECTIONS**

---

### **E) 115 Abbey Park Road, Land Adjacent Planning Application [20192102](#)**

Members welcomed the reduced height of the scheme, considered as successful in reducing the visual impact on the adjacent heritage assets. They concluded that the development as proposed is acceptable, with no amendments advanced.

## **NO OBJECTIONS**

---

### **F) 42 BELGRAVE GATE, FORMER ABC CINEMA Planning Application [20191390](#)**

The Panel broadly welcomed the alterations to elevation treatments, finishes and materials, especially the improved definition and proportions of the tallest element to Mansfield Street. However, they criticised the excessive height of the corner block to Mansfield Street, exacerbated by the narrow highways to west and north of the site.

Thus, the Panel recommended a more balanced redistribution of height and mass throughout the plot, with additional height along the new street and a potential recessed top-storey to Belgrave Gate block. They concluded that this should be associated with a reduction of height of the nine storey element by a couple of storeys, reducing the adverse impact on the adjacent Church Gate Conservation Area.

## **SEEK AMENDMENTS**

---

### **G) 29 Middleton Street Planning Application [20200401](#)**

Members of the Panel criticized the location and definition of the new dwellinghouse. They concluded that the addition of a two-storey structure on site would adversely affect the symmetry of the three pairs of dwellings along Middleton Street, and be detrimental to the character of the local streetscene,

at the 'gateway' into the Conservation Area. The development was defined as an 'unwelcomed imposition' on the local townscape that would harm the significance of the Conservation Area, and thus objected to. The loss of boundary treatments and soft landscaping to front, to create additional parking provisions, were also criticised.
