

Appendix 3

Corporate Aims to Adapt to the Impacts of Future Climate Change

Significant Effect 1: Flood Risk

Objective 1.1: Reduce the risk and impact of flash flooding across the city wide road network

Significant Effect 2: Summer Heatwaves and Prolonged Periods of Increased Temperatures

Objective 2.1: Future development of the built environment to be 'climate proofed'

Objective 2.2: Reduce the impact of the Urban Heat Island Effect

Significant Effect 3: Water Availability

Objective 3.1: Reduce subsidence risk to the Councils property portfolio and highway infrastructure

Objective 3.2: Reduce the risk of damaged to private property through subsidence caused or exacerbated by Leicester City Council owned trees
