This objection relates to the following licensing objective(s):

Prevention of crime and disorder	No
Public Safety	No
Prevention of public nuisance	Yes
Protection of children from harm	No

Representation

I wish to make representation in connection with this application for a temporary event notice (TEN) for an extension to a licensable activity as I consider this proposal will be detrimental to the licensing objective of public nuisance.

REASONS

The applicant has applied for a Temporary Event Notice to extend the opening of the premises for the sale of late-night refreshment from 16:00 hours until 03:00 hours for 6 consecutive days (5th April 2022 till 10th April 2022).

Due to the position of the premises, noise from 94 Wood Hill, Leicester, has the potential to cause noise nuisance to nearby residential properties in Wood hill and Baccrave Street. The likelihood of a nuisance being caused is even greater after midnight as the background noise in the area drops significantly.

The applicant indicates that the intention for the Temporary Event Notice is for the serving of food during the period of Ramadan.

I am concerned that noise from street activities is very difficult to control and noise from customers using the premises will affect residential properties close by especially during earlier hours of the morning.

Noise from customer vehicles, customers arriving, leaving and using the outside of

the premises until 03:00 hours daily (especially during the weekdays) will affect numerous residential properties near to and around the premises therefore, there is an increased likelihood of sleep disruption and complaint. It is worth noting; local flats and houses do not include acoustic glazing sufficient to mitigate such noise levels, nor additional ventilation that permits windows to remain closed

The Noise Team have received complaints regarding noise in the general area during the period of Ramadan although not from this premises.

I believe had the application been applied for increased hours during a weekend period only, the Noise Team may have been less inclined to make objection. However, the application is for a period of six continuous days with the possibility of further applications for further days within the month and therefore I believe that it will be very difficult for the applicant to implement sufficient controls over the period to protect nearby residents and request that this application be refused.
