49. CONDUIT STREET HIGHWAY IMPROVEMENT LINE

The Director of Transport, Regeneration and Highways submitted a report that gave details of a plan to revoke the current Highway Improvement Line in Conduit Street and implement a New Highway Improvement line following a transport study review.

The Director of Transport, Regeneration and Highways introduced the report. He stated that Prospect Leicestershire had developed a Master Plan which included a Station Improvement area, and that this area included Conduit Street.

It was explained that following a transport study, the proposal was that a new Highway Improvement line was required, but that part of the existing line was needed to be retained between London Road and Glebe Street. These proposals were supported by the Board.

RESOLVED:

That the recommendations set out in the report be supported
