A note of caution should be applied when interpreting the above data, with the following caveats noted:

- (i) Patient demographics vary across each practice
- (ii) Practices with a high proportion of patients with multiple complex long term conditions, or care home patients, may expect to see higher A&E attendances
- (iii) Practices which are closer to A&E tend to be slightly higher users of the service
- (iv) The two practices with the highest use of A&E services are managed by Inclusion Healthcare which look after homeless and the asylum seeker patients.
