Re: The Plant Room 63 Humberstone Gate, Leics

Objection to licence due to noise nuisance and lack of care to neighbours

I as caretaker of Midland House am only at my addresss on a Saturday night Sunday. On the 2 most recent bank holiday sundays the noise from this make shift roof terrace on top of the plant room has been horrendous. On the first bank holiday the noise started at full pelt at 10 am with sound checks the bass booming through my windows to the point of not being able to think. It took me 3 hours to get ready only to have left my wallet behind. I just couldnot think. This noise became constant after midday. This noise followed you across humberstone gate because the plant had their music blaring across the street from the roof top. The management lack any concideration for neighbouring properties. Like the shed that has noise restrictions and reductions put on it.

The owners only seem to give respect to a 11pm curfew on this terrace and not the noise that they are blasting everywhere. So I object strongly to their licence.
