

In line with NHS's requirement of openness and candour would you please FULLY explain why questions asked at the meeting @ Leicester Tigers Ground for which we were promised individual answers and responses, this has NOT occurred. Many of those questions had been asked several times before, again with no outcome. Access to this data is critical in being able to give a balanced Consultation process. Not only do you fail in keeping promises made, but you continue not giving evidential /robust answers or key data/decisions which could influence the final outcome. As with the late release of the ECMO/Paed report 11:15 23/6/17 giving 15 working days to consult this is NOT acceptable. Please explain the reasoning.

Eric Charlesworth
