

Leicester carbon neutral roadmap

The context for the report

Overview Select Committee –
8th September 2022

Climate change is happening and represents a critical threat across the globe

- Up to 3.6 billion people already living in a position of vulnerability to climate change
- 50-75% of global population exposed to 'life-threatening' heat or humidity by 2100 if we don't act
- 10% of species at risk of extinction under a 2°C temperature rise
- Climate change impacting on food production and contributing to global tensions over land and resources
- Wildfires, floods and other impacts affecting much of the world – including the UK

Global warming of 1.5°C and 2°C will be exceeded during the 21st century unless deep reductions in CO₂ and other greenhouse gas emissions occur in the coming decades.

(IPCC, 2021)

.... with risks and consequences for every one of us in Leicester

- Heatwaves
- Drought
- Flooding
- Storm damage
- Pressure on wildlife and risk of invasive species
- Threats to green spaces, trees and waterways
- Rising cost of food
- Increasing global insecurity

**Health
impacts and
premature
deaths**

**More pressure
on NHS**

**Rising costs of
damage to
property**

**Rising costs of
insurance**

**More families
unable to
afford the
basics**

**Loss of
biodiversity**

**Rising costs to
keep buildings
cool**

.... and more

Climate change impacts in Leicester

**2012 & 2019
Flooding**

**2022
Heatwave**

The global response so far is not enough

- Global carbon dioxide emissions have rebounded after the pandemic
- UK greenhouse gas emissions have nearly halved since 1990, but also showed a rebound of nearly 5% in 2021
- So, we can't rely on lifestyle changes post-pandemic – more needs to be done
- Current action and commitments by national governments are not yet enough

Cities must act

- Cities are estimated to be responsible for about 70% of CO₂ emissions from human activity
- No single organisation can solve the problem, but...
- Councils have control or influence over about a third of emissions in their areas and, as community leaders, are well placed to support and inspire action across society
- Our climate emergency declaration and our 2030 net zero ambition provides a rallying call, but what will it mean in practice?
- The roadmap starts to give us the detail
